

# We Are Family

A guide to nurturing the child and pet relationship from pregnancy to preschool

## Prepare your pet and home

Our pets need to be prepared for the baby's arrival. You may need to change their routines and environment.

## Actively supervise

Supervise all interaction between your pet and child. This means that you can intervene without delay.

## Securely separate

Separate the pet and child when you cannot actively supervise. Most dog attacks occur in the home.
